Kihlgren, T. E.	728, 1060, 1061		
Knerr, Horace C.	429		

INDEX OF SUBJECTS AND AUTHORS OF PAPERS

VOLUME XV

TRANSACTIONS OF AMERICAN SOCIETY FOR STEEL TREATING

January, 1929—June, 1929

A

Abnormal Steels; Solubility of Carbon in Normal and— <i>Oscar E. Harder and Willard S. Johnson</i>	49
Acid; Stainless Iron and Its Application to the Manufacture and Transportation of Nitric— <i>Dr. Walter M. Mitchell</i>	303
Acid Open-Hearth Steel for Forging Ingots; Manufacture of— <i>H. P. Rassbach</i>	289
Aircraft; Steel Failures in— <i>F. T. Sisco</i>	589
Alloy Steel as Influenced by Its Heat Treatment; Cutting Qualities of an— <i>O. W. Boston and M. N. Landis</i>	451
Alloys; Chromium-Copper Steels as Possible Corrosion Resisting Ferrous— <i>B. D. Saklatwalla and Albert W. Demmler</i>	36
Alloys; Constitution of Aluminum-Copper— <i>E. H. Dix, Jr., and H. H. Richardson</i>	368
Alloys; Constitution of Copper-Nickel— <i>N. B. Pilling and T. E. Kihlgren</i>	1061
Alloys; Constitution of Iron-Nickel— <i>Dr. Paul D. Merica</i>	881
Alloys; Constitution of Nickel-Aluminum— <i>N. B. Pilling and T. E. Kihlgren</i>	728
Alloys; Constitution of Nickel-Chromium— <i>N. B. Pilling and T. E. Kihlgren</i>	1060
Alloys with Carburizing Compounds; Depth and Character of Case Induced by Mixtures of Ferro— <i>E. G. Mahin and R. C. Spencer</i>	117
Aluminum Alloys; Constitution of Nickel— <i>N. B. Pilling and T. E. Kihlgren</i>	728
Aluminum-Copper Alloys; Constitution of— <i>E. H. Dix, Jr., and H. H. Richardson</i>	368
Aluminum Steels; An Investigation of the Physical Properties of Certain Chromium— <i>Frank B. Lounsberry and Walter R. Breeler</i>	733
Ammonia Gas Under Pressure; Surface Hardening of Special Steels with— <i>Raymond H. Hobrock</i>	543
Annealing of Sling and Crane Chains; Service— <i>William J. Merten</i>	193
Application of Science to the Steel Industry— <i>Dr. W. H. Hatfield</i>	474, 652, 817, 986
Application to the Manufacture and Transportation of Nitric Acid; Stainless Iron and Its— <i>Dr. Walter M. Mitchell</i>	303
Approximating Certain Physical Characteristics of Nitrided Steel Cases; Methods of— <i>G. M. Eaton</i>	1
Atmospheres on Steel; Effect of Furnace— <i>R. G. Guthrie</i>	96
Austenite Decomposition and Length Changes in Steel— <i>Edgar C. Bain and Willis S. N. Waring</i>	69

B

Brass and Monel Metal; Torsional Modulus of Carbon Steel, Phosphor Bronze— <i>W. P. Wood</i>	971
--	-----

Bronze, Brass and Monel Metal; Torsional Modulus of Carbon Steel, Phosphor— <i>W. P. Wood</i>	971
--	-----

C

Carbon High Chromium Steels; High— <i>J. P. Gill</i>	387
Carbon in Gray Iron; Influence of Nickel on Combined— <i>J. R. Houston</i> ..	145
Carbon in Normal and Abnormal Steels; Solubility of— <i>Oscar E. Harder and Willard S. Johnson</i>	49
Carbon Steel; Magnetic Investigations of— <i>Clifford C. Duell</i>	630
Carbon Steel, Phosphor Bronze, Brass and Monel Metal; Torsional Modulus of— <i>W. P. Wood</i>	971
Carburizing Compounds; Depth and Character of Case Induced by Mixtures of Ferro-Alloys with— <i>E. G. Mahin and R. C. Spencer</i>	117
Case Depth Measurement	729
Case Induced by Mixtures of Ferro-Alloys with Carburizing Compounds; Depth and Character of— <i>E. G. Mahin and R. C. Spencer</i>	117
Cases; Methods of Approximating Certain Physical Characteristics of Nitrided Steel— <i>G. M. Eaton</i>	1
Cast Iron—Constitution of Steel and— <i>F. T. Sisco</i>	158, 503, 837, 1027
Certain Chromium-Aluminum Steels; An Investigation of the Physical Properties of— <i>Frank B. Lounsberry and Walter R. Breeler</i>	733
Certain Physical Characteristics of Nitrided Steel Cases; Methods of Approx- imating— <i>G. M. Eaton</i>	1
Chains; Service Annealing of Sling and Crane— <i>William J. Merten</i>	193
Changes in Steel; Austenite Decomposition and Length— <i>Edgar C. Bain and Willis S. N. Waring</i>	69
Character of Case Induced by Mixtures of Ferro-Alloys with Carburizing Compounds; Depth and— <i>E. G. Mahin and R. C. Spencer</i>	117
Characteristics of Nitrided Steel Cases; Methods of Approximating Certain Physical— <i>G. M. Eaton</i>	1
Chromium Alloys; Constitution of Nickel— <i>N. B. Pilling and T. E. Kihlgren</i>	1060
Chromium-Aluminum Steels; An Investigation of the Physical Properties of Certain— <i>Frank B. Lounsberry and Walter R. Breeler</i>	733
Chromium-Copper Steels as Possible Corrosion Resisting Ferrous Alloys— <i>B. D. Saklatwalla and Albert W. Demmler</i>	36
Chromium Steels; High— <i>Owen K. Parmiter</i>	796
Chromium Steels; High Carbon High— <i>J. P. Gill</i>	387
Combined Carbon in Gray Iron; Influence of Nickel on— <i>J. R. Houston</i> ..	145
Comment and Discussion	859
Committee Releases; Recommended Practice	368, 728, 877, 1054
Compounds; Depth and Character of Case Induced by Mixtures of Ferro- Alloys with Carburizing— <i>E. G. Mahin and R. C. Spencer</i>	117
Connection with Furnace Design; Refractories and Heat Insulation in— <i>Guy A. Barker</i>	851
Constitution of Aluminum-Copper Alloys— <i>E. H. Dix, Jr., and H. H. Richardson</i>	368
Constitution of Copper-Nickel Alloys— <i>N. B. Pilling and T. E. Kihlgren</i>	1061
Constitution of High Manganese Steels; Study of the— <i>Dr. V. N. Krivobok</i>	893
Constitution of Iron-Nickel Alloys— <i>Dr. Paul D. Merica</i>	881
Constitution of Nickel-Aluminum Alloys— <i>N. B. Pilling and T. E. Kihlgren</i>	728
Constitution of Nickel-Chromium Alloys— <i>N. B. Pilling and T. E. Kihlgren</i>	1060
Constitution of Steel and Cast Iron— <i>F. T. Sisco</i>	158, 503, 837, 1027
Cooling of Steels in Quenching; Surface— <i>H. J. French, G. S. Cook and T. E. Hamill</i>	217
Copper Alloys; Constitution of Aluminum— <i>E. H. Dix, Jr., and H. H. Richardson</i>	368
Copper-Nickel Alloys; Constitution of— <i>N. B. Pilling and T. E. Kihlgren</i>	1061

Copper Steels as Possible Corrosion Resisting Ferrous Alloys; Chromium— <i>B. D. Saklatwalla and Albert W. Demmler</i>	36
Corrosion Resisting Ferrous Alloys; Chromium-Copper Steels as Possible— <i>B. D. Saklatwalla and Albert W. Demmler</i>	36
Crane Chains; Service Annealing of Sling and— <i>William J. Merten</i>	193
Cutting Qualities of an Alloy Steel as Influenced by its Heat Treat- ment— <i>O. W. Boston and M. N. Landis</i>	451

D

Decomposition and Length Changes in Steels; Austenite— <i>Edgar C. Bain and Willis S. N. Waring</i>	69
Deoxidation of Steel with Silicon— <i>Dr. C. H. Herty, Jr., and G. R. Fitterer</i>	569
Depth and Character of Case Induced by Mixtures of Ferro-Alloys with Carburizing Compounds— <i>E. G. Mahin and R. C. Spencer</i>	117
Depth Measurement; Case	729
Design; Refractories and Heat Insulation in Connection with Furnace— <i>Guy A. Barker</i>	851
Discussion; Comment and	859

E

Effect of Furnace Atmospheres on Steel— <i>R. G. Guthrie</i>	96
Electric Furnaces for Heat Treating; Progress Made in the Use of— <i>A. N. Otis</i>	767
Elevated Temperatures; Stability of Metals at— <i>C. L. Clark and A. E. White</i>	670
Engineering Index	173, 374, 519, 715, 865, 1046

F

Failures in Aircraft; Steel— <i>F. T. Sisco</i>	589
Ferro-Alloys with Carburizing Compounds; Depth and Character of Case Induced by Mixtures of— <i>E. G. Mahin and R. C. Spencer</i>	117
Ferrous Alloys; Chromium-Copper Steels as Possible Corrosion Resist- ing— <i>B. D. Saklatwalla and Albert W. Demmler</i>	36
Forging Ingots; Manufacture of Acid Open-Hearth Steel for— <i>H. P. Rassbach</i>	289
Furnace Atmospheres on Steel; Effect of— <i>R. G. Guthrie</i>	96
Furnace Design; Refractories and Heat Insulation in Connection with— <i>Guy A. Barker</i>	851
Furnaces for Heat Treating; Progress Made in the Use of Electric— <i>A. N. Otis</i>	767
Further Observations on the Microstructure of Martensite— <i>Francis F. Lucas</i>	339

G

Gas Under Pressure; Surface Hardening of Special Steels with Ammonia— <i>Raymond H. Hobrock</i>	543
General Recommendation for the Heat Treatment of Tool Steels	877
Graphitization in the Presence of Nickel— <i>H. A. Schwartz</i>	957
Gray Iron; Influence of Nickel on Combined Carbon in— <i>J. R. Houston</i> ..	145

H

Hardening of Special Steels with Ammonia Gas Under Pressure; Sur- face— <i>Raymond H. Hobrock</i>	543
Heat Insulation in Connection with Furnace Design; Refractories and— <i>Guy A. Barker</i>	851
Heat Treating; Progress Made in the Use of Electric Furnaces for— <i>A. N. Otis</i>	767
Heat Treating High Speed Steel; New Method for— <i>Horace C. Knerr</i> ..	429
Heat Treatment; Cutting Qualities of an Alloy Steel as Influenced by its— <i>O. W. Boston and M. N. Landis</i>	451

Heat Treatment of Tool Steels; Tentative General Recommendation for the	877
High Carbon High Chromium Steels— <i>J. P. Gill</i>	387
High Chromium Steels— <i>Owen K. Parmiter</i>	796
High Manganese Steels; Study of the Constitution of— <i>V. N. Krivobok</i> ..	893
High Speed Steel; New Method for Heat Treating— <i>Horace C. Knerr</i> ..	429

I

Index, Engineering	173, 374, 519, 715, 865, 1046
Induced by Mixtures of Ferro-Alloys with Carburizing Compounds; Depth and Character of Case— <i>E. G. Mahin and R. C. Spencer</i>	117
Industry; Application of Science to the Steel— <i>Dr. W. H. Hatfield</i>	474, 652, 817, 986
Influence of Nickel on Combined Carbon in Gray Iron— <i>J. R. Houston</i> ..	145
Influenced by its Heat Treatment; Cutting Qualities of an Alloy Steel as— <i>O. W. Boston and M. N. Landis</i>	451
Ingots; Manufacture of Acid Open-Hearth Steel for Forging— <i>H. P. Rassbach</i>	289
Insulation in Connection with Furnace Design; Refractories and Heat— <i>Guy A. Barker</i>	851
Investigation of the Physical Properties of Certain Chromium-Aluminum Steels— <i>Frank B. Lounsberry and Walter R. Breeler</i>	733
Investigations of Carbon Steel; Magnetic— <i>Clifford C. Duell</i>	630
Iron; Constitution of Steel and Cast— <i>F. T. Sisco</i>	158, 503, 837, 1027
Iron; Influence of Nickel on Combined Carbon in Gray— <i>J. R. Houston</i> ..	145
Iron and Its Application to the Manufacture and Transportation of Nitric Acid; Stainless— <i>Dr. Walter M. Mitchell</i>	303
Iron-Nickel Alloys; Constitution of— <i>Dr. Paul D. Merica</i>	881

L

Length Changes in Steel; Austenite Decomposition and— <i>Edgar C. Bain and Willis S. N. Waring</i>	69
---	----

M

Magnetic Investigations of Carbon Steel— <i>Clifford C. Duell</i>	630
Manganese Steels; Study of the Constitution of High— <i>Dr. V. N. Krivobok</i>	893
Manufacture and Transportation of Nitric Acid; Stainless Iron and Its Application to the— <i>Dr. Walter M. Mitchell</i>	303
Manufacture of Acid Open-Hearth Steel for Forging Ingots— <i>H. P. Rassbach</i>	289
Martensite; Further Observations on the Microstructure of— <i>Francis F. Lucas</i>	339
Measurement; Case Depth	729
Mechanical Properties of Nickel; Physical and— <i>Dr. Paul D. Merica</i> ..	1054
Metal; Torsional Modulus of Carbon Steel, Phosphor Bronze, Brass and Monel— <i>W. P. Wood</i>	971
Metals at Elevated Temperatures; Stability of— <i>C. L. Clark and A. E. White</i>	670
Method for Heat Treating High Speed Steel; New— <i>Horace C. Knerr</i> ..	429
Methods of Approximating Certain Physical Characteristics of Nitrided Steel Cases— <i>G. M. Eaton</i>	1
Microstructure of Martensite; Further Observations on the— <i>Francis F. Lucas</i>	339
Mixtures of Ferro-Alloys with Carburizing Compounds; Depth and Character of Case Induced by— <i>E. G. Mahin and R. C. Spencer</i>	117
Modulus of Carbon Steel, Phosphor Bronze, Brass and Monel Metal— <i>W. P. Wood</i>	971
Monel Metal; Torsional Modulus of Carbon Steel, Phosphor Bronze, Brass and— <i>W. P. Wood</i>	971

N

New Method for Heat Treating High Speed Steel— <i>Horace C. Knerr</i> ..	429
News of the Society	186, 528, 885
Nickel; Graphitization in the Presence of— <i>H. A. Schwartz</i>	957
Nickel; Physical and Mechanical Properties of— <i>Dr. Paul D. Merica</i> ..	1054
Nickel-Aluminum Alloys; Constitution of— <i>N. B. Pilling and T. E. Kihlgren</i>	728
Nickel Alloys; Constitution of Copper— <i>N. B. Pilling and T. E. Kihlgren</i>	1061
Nickel Alloys; Constitution of Iron— <i>Dr. Paul D. Merica</i>	881
Nickel-Chromium Alloys; Constitution of— <i>N. B. Pilling and T. E. Kihlgren</i>	1060
Nickel on Combined Carbon in Gray Iron; Influence of— <i>J. R. Houston</i> ..	145
Nitric Acid; Stainless Iron and Its Application to the Manufacture and Transportation of— <i>Dr. Walter M. Mitchell</i>	303
Nitrided Steel Cases; Methods of Approximating Certain Physical Char- acteristics of— <i>G. M. Eaton</i>	1
Normal and Abnormal Steels; Solubility of Carbon in— <i>Oscar E. Harder and Willard S. Johnson</i>	49

O

Observations on the Microstructure of Martensite; Further— <i>Francis F. Lucas</i>	339
Open-Hearth Steel for Forging Ingots; Manufacture of Acid— <i>H. P. Rassbach</i>	289

P

Patents; Reviews of Recent	170, 371, 516, 862, 1043
Phosphor Bronze, Brass and Monel Metal; Torsional Modulus of Carbon Steel— <i>W. P. Wood</i>	971
Physical and Mechanical Properties of Nickel— <i>Dr. Paul D. Merica</i>	1054
Physical Characteristics of Nitrided Steel Cases; Methods of Approx- imating Certain— <i>G. M. Eaton</i>	1
Physical Properties of Certain Chromium-Aluminum Steels; An Investi- gation of the— <i>Frank B. Lounsberry and Walter R. Breeler</i>	733
Possible Corrosion Resisting Ferrous Alloys; Chromium-Copper Steels as— <i>B. D. Saklatwalla and Albert W. Demmler</i>	36
Practice Committee Releases; Recommended	368, 728, 877, 1054
Presence of Nickel; Graphitization in the— <i>H. A. Schwartz</i>	957
Pressure; Surface Hardening of Special Steels with Ammonia Gas Under— <i>Raymond H. Hobrock</i>	543
Progress Made in the Use of Electric Furnaces for Heat Treating— <i>A. N. Otis</i>	767
Properties of Certain Chromium-Aluminum Steels; An Investigation of the Physical— <i>Frank B. Lounsberry and Walter R. Breeler</i>	733
Properties of Nickel; Physical and Mechanical— <i>Dr. Paul D. Merica</i> ..	1054

Q

Qualities of an Alloy Steel as Influenced by its Heat Treatment; Cut- ting— <i>O. W. Boston and M. N. Landis</i>	451
Quenching; Surface Cooling of Steels in— <i>H. J. French, G. S. Cook and T. E. Hamill</i>	217

R

Recent Patents; Reviews of	170, 371, 516, 862, 1043
----------------------------------	--------------------------

	Recommendation for the Heat Treatment of Tool Steels; Tentative General	877
429	Recommended Practice Committee Releases	368, 728, 877, 1054
885	Refractories and Heat Insulation in Connection with Furnace Design— <i>Guy A. Barker</i>	851
957	Releases; Recommended Practice Committee	368, 728, 877, 1054
1054	Resisting Ferrous Alloys; Chromium-Copper Steels as Possible Corrosion— <i>B. D. Saklatwalla and Albert W. Demmler</i>	36
728	Reviews of Recent Patents	170, 371, 516, 862, 1043

S

	Science to the Steel Industry; Application of— <i>Dr. W. H. Hatfield</i>	474, 652, 817, 986
	Service Annealing of Sling and Crane Chains— <i>William J. Merten</i>	193
49	Silicon; Deoxidation of Steel with— <i>Dr. C. H. Herty, Jr., and G. R. Fitterer</i>	569
	Sling and Crane Chains; Service Annealing of— <i>William J. Merten</i>	193
	Society; News of the	186, 528, 885
	Solubility of Carbon in Normal and Abnormal Steels— <i>Oscar E. Harder and Willard S. Johnson</i>	49
339	Special Steels with Ammonia Gas Under Pressure; Surface Hardening of— <i>Raymond H. Hobrock</i>	543
289	Stability of Metals at Elevated Temperatures— <i>C. L. Clark and A. E. White</i>	670
	Stainless Iron and Its Application to the Manufacture and Transporta- tion of Nitric Acid— <i>Dr. Walter M. Mitchell</i>	303
	Steel; Austenite Decomposition and Length Changes in— <i>Edgar C. Bain and Willis S. N. Waring</i>	69
1043	Steel; Effect of Furnace Atmospheres on— <i>R. G. Guthrie</i>	96
971	Steel; Magnetic Investigations of Carbon— <i>Clifford C. Duell</i>	630
1054	Steel; New Method for Heat Treating High Speed— <i>Horace C. Knerr</i>	429
	Steel and Cast Iron; Constitution of— <i>F. T. Sisco</i>	158, 503, 837, 1027
1	Steel as Influenced by its Heat Treatment; Cutting Qualities of an Alloy— <i>O. W. Boston and M. N. Landis</i>	541
733	Steel Cases; Methods of Approximating Certain Physical Characteristics of Nitrided— <i>G. M. Eaton</i>	1
36	Steel Failures in Aircraft— <i>F. T. Sisco</i>	589
1054	Steel for Forging Ingots; Manufacture of Acid Open-Hearth— <i>H. P. Rassbach</i>	289
957	Steel Industry; Application of Science to the— <i>Dr. W. H. Hatfield</i>	474, 652, 817, 986
543	Steel, Phosphor Bronze, Brass and Monel Metal; Torsional Modulus of Carbon— <i>W. P. Wood</i>	971
767	Steel with Silicon; Deoxidation of— <i>Dr. C. H. Herty, Jr., and G. R. Fitterer</i>	569
733	Steels; High Carbon High Chromium— <i>J. P. Gill</i>	387
1054	Steels; High Chromium— <i>Owen K. Parmiter</i>	796
	Steels; Solubility of Carbon in Normal and Abnormal— <i>Oscar E. Harder and Willard S. Johnson</i>	49
	Steels; Study of the Constitution of High Manganese— <i>Dr. V. N. Krivobok</i>	893
Cut- ... 451	Steels; Tentative General Recommendation for the Heat Treatment of Tool	877
217	Steels as Possible Corrosion Resisting Ferrous Alloys; Chromium- Copper— <i>B. D. Saklatwalla and Albert W. Demmler</i>	36
	Steels in Quenching; Surface Cooling of— <i>H. J. French, G. S. Cook and T. E. Hamill</i>	217
	Steels with Ammonia Gas Under Pressure; Surface Hardening of Special— <i>Raymond H. Hobrock</i>	543
862, 1043	Study of the Constitution of High Manganese Steels— <i>Dr. V. N. Krivobok</i>	893

Surface Cooling of Steels in Quenching— <i>H. J. French, G. S. Cook and T. E. Hamill</i>	217
Surface Hardening of Special Steels with Ammonia Gas Under Pres- sure— <i>Raymond H. Hobrock</i>	543

T

Temperatures; Stability of Metals at Elevated— <i>C. L. Clark and A. E. White</i>	670
Tentative General Recommendation for the Heat Treatment of Tool Steels	877
Tool Steels; Tentative General Recommendation for the Heat Treat- ment of	877
Torsional Modulus of Carbon Steel, Phosphor Bronze, Brass and Monel Metal— <i>W. P. Wood</i>	971
Transportation of Nitric Acid; Stainless Iron and Its Application to the Manufacture and— <i>Dr. Walter M. Mitchell</i>	303
Treating; Progress Made in the Use of Electric Furnaces for Heat— <i>A. N. Otis</i>	767
Treating High Speed Steel; New Method for Heat— <i>Horace C. Knerr</i> ..	429
Treatment; Cutting Qualities of an Alloy Steel as Influenced by its Heat— <i>O. W. Boston and M. N. Landis</i>	451
Treatment of Tool Steels; Tentative General Recommendation for the Heat	877

U

Under Pressure; Surface Hardening of Special Steels with Ammonia Gas— <i>Raymond H. Hobrock</i>	543
Use of Electric Furnaces for Heat Treating; Progress Made in the— <i>A. N. Otis</i>	767
